# Resource Allocation and Productivity in Agriculture

Diego Restuccia University of Toronto

CSAE Conference University of Oxford – March 2015

### Average Farm Size across Countries

► Adamopoulos and Restuccia (AER, 2014) "The Size Distribution of Farms..."

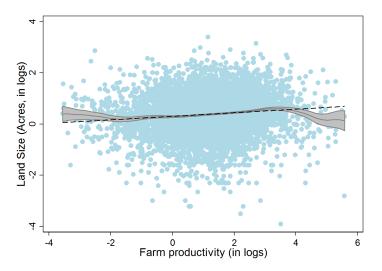

#### Land Quality across Countries

Table: Production by Potential Yield (Counterfactual GAEZ Data)

|          | All Crops<br>(country obs. = 162) |                 |           |
|----------|-----------------------------------|-----------------|-----------|
|          | Actual Yield                      | Potential Yield | Yield Gap |
| Rich 10% | 739.5                             | 1,220.0         | 1.65      |
| Poor 10% | 235.5                             | 1,160.6         | 4.93      |
| Ratio    | 3.14                              | 1.05            | 1/2.99    |

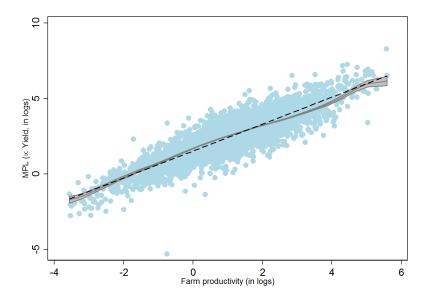

Adamopoulos and Restuccia (2015) "Geography and Agricultural Productivity..."

# Land Size by Farm TFP: Malawi

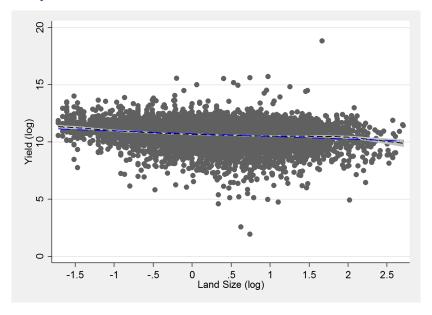

► Restuccia and Santaeulalia-Llopis (2015) "Land Misallocation and Productivity"

# Land Productivity (Yield) by Farm TFP: Malawi

## Yield by Farm Size: Malawi

#### Implications of Resource Misallocation

- ► Increase in agricultural TFP: **3.6-fold** (output loss .28)
- Reduce inequality and poverty

| Farm Income | Q1   | Q5   | Ratio |
|-------------|------|------|-------|
| Actual      | .14  | 4.8  | 34.1  |
| Efficient   | 4.3  | 14.7 | 3.4   |
| Ratio       | 30.6 | 3.1  | _     |

Structural change

|           | Actual | Reallocation |
|-----------|--------|--------------|
| $TFP_a$   | 1.0    | 3.6          |
| $N_a$     | 0.65   | 0.04         |
| Yield     | 1.0    | 1.0          |
| $Y_a/N_a$ | 1.0    | 16.2         |
| AFS       | 1.0    | 16.6         |

► Broader impacts with endogenous investments by farmers, mechanization, selection in ability across sectors
