

## REVERBERATORY FURNACE

- (1) A furnace or kiln in which the material under treatment is heated indirectly by means of a flame deflected downward from the roof. (*The American Heritage Dictionary, 2000*).
- (2) Of a furnace, kiln, etc.: So constructed that the flame is forced back upon the substance exposed to it. (*Oxford English Dictionary Online*).
- (3) a furnace in which heat is radiated from the roof onto the material treated (*Merriam Webster Online*)
