

Graduate Labour Economics I (ECO2800H1F)

University of Toronto

Fall 2020, Wednesdays, 4 - 6 pm

Online

David J. Price

david.price@utoronto.ca

Office hours: Mondays, 10-11 am

Online

This is a graduate course in labour economics, appropriate for graduate students in the Department of Economics and other students with preparation in microeconomic theory and econometrics. The course teaches core topics in the field of labour economics as well as empirical methods for applied microeconomic analysis. The goal of this course is to prepare students to produce and consume published labour economics research.

Grading will be based on participation in class (10%), a referee report (15%), a research paper (40%), and a final examination (35%).

Participation

To earn full marks for participation, you will be expected to participate in class discussions. To do this, you should be familiar with all papers listed for each class in the syllabus, but **don't be intimidated by the number of papers**; you can ask questions about the papers in class, and we will discuss how to tackle them. Part of the goal of this class is to practice reading many papers quickly. All papers can be downloaded from a link in the syllabus, from the website of the working paper series indicated, or from the library's website. Let me know if there are any you can't find. I will also post discussion questions on Quercus; we likely will not discuss all of them, but please come prepared to discuss them.

In addition, beginning with the second class, one paper will be marked **in bold** for each class. For that paper, you should prepare a brief presentation with four short slides: (1) a short summary of the paper, (2) what the paper does well, (3) what the weaknesses are in the paper, and (4) where to go next—that is, what future research could do to build off of the results in this paper. You must submit your slides on Quercus by 11:59pm the day before class. In class, I will randomly choose (at least) one student to present their slides.

This class will take place online. We will begin on Zoom, though that is subject to change; you will receive details about the system to use on Quercus. This class functions best interactively. To help with that, you must have a usable microphone, and you are strongly encouraged to have your camera on. Please let me know if you expect that to be a problem.

Referee report

The referee report will be due on October 11 at 11:59 pm. You will choose a working paper on labour economics from the last 3 or so years that is not on this syllabus, and write about 3-5 pages briefly summarizing it; explaining the contribution; listing suggestions for improvement (which should take most of your space); and advising the editor of the *Journal of Labor Economics* whether, and why, to accept the paper as is, request revisions, or reject it.

Research paper

The research paper may be a first draft of some original work or a research proposal that outlines the steps you would take to produce original work. The purpose of the research paper is to get you started thinking about how empirical research is actually done. You must submit a brief paragraph on at least one potential research topic (and hopefully a paragraph each on a couple of backup ideas) by October 18 at 11:59pm on Quercus; we will set up meetings to discuss your idea(s) for the week of October 19. The paper is due December 6 at 11:59 pm. You may choose to submit your paper a week or two after the official end of the class, assuming that sufficient effort is being made already and you expect to improve on the paper with the additional time. Grading will take into account the additional time.

Final exam

The final exam will be a take-home test; we will discuss it in class closer to the end of the semester.

Your next steps

Taking this class and ECO2801 will help you understand the labour economics literature and help prepare you to produce and consume labour economics research. However, it will *not* give you a complete picture of the breadth or depth of labour economics. For added breadth, you can see surveys of many areas in the *Handbook of Labor Economics* from Elsevier. You might also look at undergrad texts by Borjas (*Labor Economics*) and Benjamin, Gunderson, Lemieux, and Riddell (*Labour Market Economics*), or the graduate text by Cahuc, Carcillo, and Zylberberg (*Labor Economics*). I also encourage you to read *Mostly Harmless Econometrics* by Angrist and Pischke for a guide to the empirics of modern labour economics. For added depth, you should read many more articles than those listed here. If you are particularly interested in a paper in this syllabus (or elsewhere), you can find links to articles that cite, or are cited by, that article at <https://ideas.repec.org/>.

I also strongly encourage you to attend the applied micro lunch on Tuesdays from 1:10 to 2:00 pm (see <https://www.economics.utoronto.ca/index.php/index/research/seminars?dateRange=future&seriesId=18>), and the applied micro seminar on Fridays from 11:10 am to 12:30 pm or 3:40 to 5:00 pm (time may vary across the year; see <https://www.economics.utoronto.ca/index.php/index/research/seminars?dateRange=future&seriesId=6>). For more details, let me know and I can get you added to the email list.

Class schedule

1. **Sept 16:** Background, with applications to the minimum wage
2. **Sept 23:** Social insurance and labour supply
3. **Sept 30:** General labour supply topics
4. **Oct 7:** Firms and wages: decompositions
5. **Oct 14:** Firms and wages: layoffs and other analyses
6. **Oct 21:** Racial discrimination
7. **Oct 28:** Gender gaps

8. **Nov 4:** Unions
Reading Week
9. **Nov 18:** Immigration
10. **Nov 25:** Intergenerational mobility
11. **Dec 2:** Neighborhoods and children
12. **Dec 9:** Cross-sectional inequality

Readings associated with classes

1 Background, with applications to the minimum wage

Background

- Duflo, Esther, 2017. “The Economist as Plumber,” *American Economic Review: Papers and Proceedings* 107(5): 1-26.
- Imbens, Guido W., and Joshua D. Angrist. “Identification and Estimation of Local Average Treatment Effects.” *Econometrica*, vol. 62, no. 2, 1994, pp. 467–475. 156(1): 27–37.
- Rubinstein, Ariel. “Dilemmas of an Economic Theorist.” *Econometrica*, vol. 74, no. 4, 2006, pp. 865–883.

The minimum wage

- Card, David and Krueger, Alan B, 1994. “Minimum Wages and Employment: A Case Study of the Fast-Food Industry in New Jersey and Pennsylvania,” *American Economic Review*, 84(4), pages 772-793.
- DiNardo, John, Fortin, Nicole M and Lemieux, Thomas, 1996. “Labor Market Institutions and the Distribution of Wages, 1973-1992: A Semiparametric Approach,” *Econometrica*, 64(5), pages 1001-1044.
- Falk, Armin, Ernst Fehr and Christian Zehnder, 2006. “Fairness Perceptions and Reservation Wages—the Behavioral Effects of Minimum Wage Laws,” *The Quarterly Journal of Economics*, 121(4), pages 1347-1381.

2 Social insurance and labour supply

- Bitler, M., J. Gelbach, H. Hoynes. (2006). “What Mean Impacts Miss: Distributional Effects of Welfare Reform Experiments,” *American Economic Review* 96 (4), 988-1012.
- Card, David and Dean R. Hyslop. “Estimating the Effects of a Time-Limited Earnings Subsidy for Welfare-Leavers.” *Econometrica* 73 (6), 2005, 1723–1770.
- Cesarini, David, Erik Lindqvist, Matthew J. Notowidigdo and Robert Ostling, 2017. “The Effect of Wealth on Individual and Household Labor Supply: Evidence from Swedish Lotteries,” *American Economic Review*, 107(12), pages 3917-3946.

- ★ **Chetty, Raj and Emmanuel Saez, 2013. “Teaching the Tax Code: Earnings Responses to an Experiment with EITC Recipients,” *American Economic Journal: Applied Economics*, vol. 5(1), pages 1-31.**
- Eissa, N. and J. Liebman, “Labor Supply Response to the Earned Income Tax Credit,” *Quarterly Journal of Economics* 111 (2), May 1996.
- Schmieder, Johannes F., Till von Wachter, and Stefan Bender. 2016. “The Effect of Unemployment Benefits and Nonemployment Durations on Wages.” *American Economic Review*, 106 (3): 739–777.

3 General labour supply topics

- Aguiar, Mark, Mark Bilal, Kerwin Kofi Charles, and Erik Hurst, 2017. “Leisure Luxuries and the Labor Supply of Young Men,” NBER Working Papers 23552.
- Camerer, Colin, Babcock, Linda, Loewenstein, George and Thaler, Richard, 1997. “Labor Supply of New York City Cab Drivers: One Day At A Time,” *The Quarterly Journal of Economics*, 112(2), pages 407-441.
- Crawford, Vincent P., and Juanjuan Meng. 2011. “New York City Cab Drivers’ Labor Supply Revisited: Reference-Dependent Preferences with Rational-Expectations Targets for Hours and Income.” *American Economic Review*, 101 (5): 1912-32.
- Farber, Henry, 2005. “Is Tomorrow Another Day? The Labor Supply of New York City Cabdrivers,” *Journal of Political Economy*, 113(1) 46-82.
- Farber, Henry S. 2008. “Reference-Dependent Preferences and Labor Supply: The Case of New York City Taxi Drivers.” *American Economic Review*, 98 (3): 1069-82.
- ★ **Fehr, Ernst, and Lorenz Goette. 2007. “Do Workers Work More if Wages Are High? Evidence from a Randomized Field Experiment.” *American Economic Review*, 97 (1): 298-317.**

4 Firms and wages: decompositions

- Abowd, John, Francis Kramarz, and David Margolis, “High Wage Workers and High Wage Firms,” *Econometrica*, 1999, 67 (2), 251–333.
- Bonhomme, S., T. Lamadon and E. Manresa, 2019. “A Distributional Framework for Matched Employer Employee Data,” *Econometrica*, 87(3), 699–739.
- Borovickova, Katarina and Robert Shimer, 2017. “High Wage Workers Work for High Wage Firms,” NBER Working Papers 24074.
- ★ **Card, David, Jorg Heining, and Patrick Kline, “Workplace Heterogeneity and the Rise of West German Wage Inequality,” *The Quarterly Journal of Economics*, 2013, 128 (3), 967–1015.**
- Davis, Steve J. and John Haltiwanger, “Wage Dispersion Between and Within U.S. Manufacturing Plants, 1963-1986,” *Brookings Papers on Economic Activity: Microeconomics*, 1991, pp. 115–200.

- Gibbons, Robert and Lawrence Katz, “Does Unmeasured Ability Explain Inter-Industry Wage Differentials?” *Review of Economic Studies*, Vol. 59, No. 3 (Jul., 1992), pp. 515–535.
- Kline, Patrick, Raffaele Saggio, Mikkel Solvsten, 2018. “Leave-out estimation of variance components,” Papers 1806.01494, arXiv.org.
