Michele Piccione
Andrea Prat
Roy Radner
Debraj Ray
Arthur J. Robson
Ariel Rubinstein*
Thomas J. Sargent
Mark A. Satterthwaite
Uzi Segal
Chris Shannon
Hyun Song Shin
Marciano Siniscalchi
Joel Sobel
Ran Spiegler
Jeroen M. Swinkels
Neil Wallace

Associate Editors on leave

Yeon-Koo Che
Eddie Dekel
Larry Samuelson
*Executive Board

Theoretical Economics is a new journal that will publish leading research in economic theory. It differs from existing journals in economic theory in one major respect: its full content will be freely available on the web. Authors of accepted papers grant the journal a nonexclusive right to publish their work, but otherwise retain full rights. Submissions are peer-reviewed in the traditional way; issues will be published quarterly. (Each annual volume will be available also in hard copy at a modest price.) The standard for acceptance is the same as that of the current leading journals in economic theory.

editorial board

The Editorial Board has the expertise, enthusiasm, and credibility in the profession to ensure that **Theoretical Economics** succeeds. It includes all Editors of *Econometrica* since 1992, as well as former Editors and Associate Editors of other leading journals, including the *American Economic Review* and *Review of Economic Studies*.

society for economic theory

Theoretical Economics is published by the Society for Economic Theory, a nonprofit organization devoted to the efficient dissemination of leading research in economic theory. The modest expense of operating the journal will be covered by a submission fee, currently US\$75. Authors of accepted papers will have the option of putting their papers in the journal's format, or of paying a small production fee. (See the journal website econtheory.org for details.)

open access

The free availability of **Theoretical Economics** removes the impediment to scientific communication created by publishers' exercise of intellectual property rights. Open Access enables authors to obtain the maximum possible exposure for their work. In fields with established Open Access journals, articles in those journals are cited more frequently than articles in other journals.

papers to appear

Some of the papers to appear in Volume 1 (2006) of **Theoretical Economics**:

- Yeon-Koo Che and Ian Gale, "Revenue comparisons for auctions when bidders have arbitrary types"
- Amil Dasgupta and Andrea Prat, "Financial equilibrium with career concerns"
- Jeffrey C. Ely and Marcin Peski, "Hierarchies of belief and interim rationalizability"
- Srihari Govindan and Robert B. Wilson, "Sufficient conditions for stable equilibria"
- Ariel Rubinstein and Yuval Salant, "A model of choice from lists"
- Larry Samuelson and Jeroen Swinkels, "Information, evolution and utility"
