ECONOMICS 301Y1

The Economic History of Later Medieval and Early Modern Europe

(European Economic History, 1250 - 1750)

SCHEDULE OF LECTURE TOPICS: SEPTEMBER 2009 - MARCH 2010

Revised: 27 January 2010

Suggested Readings: Optional (as background readings): read as much as you think necessary.

Carlo Cipolla, *Before the Industrial Revolution, 1000 - 1700*, 3rd edn. (1993)

Ralph Davis, *The Rise of the Atlantic Economies* (1973)

Peter Musgrave, *The Early Modern European Economy* (1999)

Thomas Brady, James Tracy, et al, eds., *Handbook of European History, 1400-1600: Late Middle Ages, Renaissance and Reformation*, Vol. I: *Structures and Assertions* (1994).

Jan de Vries, *The Economy of Europe in an Age of Crisis, 1600-1750* (1976).

Readings from the Essay and Reading Topics lists are indicated by ET1, ET2, ET3, though in some cases the readings for the designated essay topics are related only tangentially to the specific lecture topic indicated. Furthermore, most of the readings will not coincide with the lectures, so that you will have to skim read and search out the relevant sections or pages for yourself. I see no point in constructing lectures that are mere replicas of textbooks, which you can more readily read for yourself.

Lectures are either two hours or two (with a ten minute break at the hour), on Wednesday afternoons, from 3:00 to 5:00 pm, in University College: UC 161.

In order to make up for the four lecture hours eliminated by the shift from a 13-week to a 12-week semester system (total of 24 weeks for a full-year course), I may have to lecture until 5:30 p.m., for four of the twelve weeks, each semester. Otherwise, I will have to cut out lecture topics, for which you will still be liable for the final examination. In the Faculty of Arts, at the University of Toronto, we had already been lecturing for far fewer hours in the academic year than is customary in most North American universities. To reduce the lecture hours and course material even more is, to me, an unacceptable debasement of our academic standards. Since most of you are paying substantial fees for your education, you are surely entitled to demand your money's worth.

I enjoy lecturing, but I cannot enjoy it if I feel that I am not delivering a proper course, one that covers the major topics for this era (half a millennium) in European economic history.

Week no., Wednesday Dates, and Suggested Readings	Lecture No.	LECTURE TOPICS to be covered
1. 9 September 2009	1	<p>INTRODUCTION to Eco 301Y1: Course organization and central themes.</p> <p>Introduction to Medieval European Economic History: Was Europe Unique?</p>
