For each section, the readings are listed in the chronological order of original publication. Items of exceptional importance -- including those denounced by later historians -- are indicated by an asterisk (*).

READINGS:

A. General and Methodological

1. Thomas R. Malthus, An Essay on the Principle of Population, 1st edn. (London, 1798); 6th edn., 2 vols. (London, 1826).
2. A.M. Carr-Saunders, The Population Problem: A Study in Human Evolution (Oxford, 1922).
3. A.M. Carr-Saunders, World Population: Past Growth and Present Trends (New York, 1936). Especially chapters 6-7.
- * 4. J.C. Russell, British Medieval Population (Albuquerque, 1948).
- * 5. Carlo Cipolla, Jan Dhondt, Michael Postan, and Philippe Wolff, 'Rapports collectif,' IXe congrès international des sciences historiques, Paris août - septembre 1950, 1 (1950), 225-41. Michael Postan's contribution was revised and subsequently published as the following:
- ** 6. Michael Postan, 'The Economic Foundations of Medieval Society,' Jahrbücher für Nationalökonomie, 161 (1951); and:

Michael Postan, 'Some Economic Evidence of Declining Population in the Later Middle Ages,' Economic History Review, 2nd ser. 2 (1950), 130-67;

both reprinted in his Essays on Medieval Agriculture and General Problems of the Medieval Economy (Cambridge, 1973), pp. 3 - 27; and 186 - 213 (the latter, with the revised title of 'Some Agrarian Evidence of Declining Population in the Later Middle Ages.'

7. Roger Mols, Introduction à la démographie historique des villes d'Europe du XIVe au XVIIIe siècles, 3 vols. (Louvain-Gembloux, 1954-56). See Vol. I on methodology.

QUESTIONS ON DEMOGRAPHY

1. When did the general growth of European population, the demographic upswing that commenced in the 10th-11th centuries, cease? In the later 13th century? In the early 14th century? Not until the Black Death of 1348? Or later? WHY and HOW?
2. What brought about the drastic demographic declines in 14th and 15th century Europe? Did a 'Malthusian Crisis' trigger that population decline? Or was the demographic decline chiefly the result of Plague? Were the causes of European population decline essentially endogenous or exogenous to the functioning of the European economy?
3. What relationships were there, in the 14th and 15th centuries, between/among: famine, warfare, and disease?
4. What was the Black Death? What forms did it take? How was it introduced into Europe? How did it spread? What determined or influenced the mortality rates from the Black Death and succeeding plagues?
5. What other factors determined high death rates in late-medieval Europe, in rural and urban areas?
6. What factors influenced changes in birth rates? What was the more powerful factor in determining demographic changes and population levels: the birth rate or the death rate? How were the two related?
7. What is the 'European marriage pattern'? What influence did it come to have on European birth and death rates? When did it commence -- in the Middle Ages, or later, in the early-modern era? Is there any evidence for a European marriage pattern anywhere in medieval Europe?
8. Why did the population decline continue for so long, into the 15th century? When, where, how, and why did that population decline come to a halt? What brought about the beginnings of population recovery?
9. What were the general economic and social consequences of population decline in late medieval Europe?
10. Discuss the relationships between living standards and population levels, demographic change.
11. Did demographic decline produce economic decline, or stagnation; or did it foster change and new economic growth?
